# **CITY OF KEARNEY** **PRESS RELEASE** ***For Immediate Release***

Issued Date: November 4, 2014

Point of Contact: Michele Hill, GIS Coordinator, (308) 233-3250

## **Street Closure Information Now Viewable on City Web Page**

The City of Kearney GIS Division is pleased to announce a new source of information regarding street closures, traffic redirections, and detours available on the City website via a new GIS application called Cone Zone. Cone Zone is a product that integrates with the City's GIS data to provide locations and other relevant details about road closures and detours in the City.

The Cone Zone link can be found on the City's web page and is accessed by clicking the "cone" icon on the home page. A cover sheet will appear which describes current street and lane closures in the City by project location along with a brief description. There are instructions listed at the top of the page which directs users on how to access the interactive map to view the Cone Zone project locations.

When the Cone Zone map is opened, users can either zoom in to the project location or enter the first word of the project title in a search box and the map will zoom to the location of that project. There will be symbols on the map which indicate the exact location of lanes and roads that are closed and, if applicable, established detour routes. An information box also appears with details about the project such as the date of closing and estimated reopening, a description of the project, and a contact name for further information if needed.

Cone Zone will be continually updated as closures occur in the City so as to have the best and most current information possible available to the public. Cone Zone should be beneficial to the public, law enforcement, and emergency responders by providing them with information on street closures.

Anyone with questions regarding the Cone Zone map or the City's GIS program is encouraged to contact Michele Hill, GIS Coordinator, and (308) 233-3250.
