CITY OF KEARNEY

PRESS RELEASE

For Immediate Release

Issued Date: May 16, 2025

Point of Contact: Dan Lillis, Stormwater Program Manager, 308-233-3273

Storm Drains Are For Rain Water Only

Storm Drains Are Not for Grass Clippings and Leaves

They may be small, but they add up.

Grass clippings and leaves blown into the street during yard maintenance don't just disappear; they end up in the nearest river or plugging local storm sewer systems. Stormwater does **not** get filtered prior to reaching receiving waters. When it rains, anything in the street washes into storm drains that lead to area lakes and rivers. Why should you be concerned? Organic matter such as grass and leaves can cause odors in neighborhood lakes and creeks, and drainage problems that lead to regional flooding.

So what's the best place for yard trimmings?

- Blow grass clippings back onto the lawn, where they become a natural fertilizer
- Rake or blow excess mulching into a compost pile, where they can decompose without odor
- Collect them and put them into a yard waste container that the City picks up weekly

You can help the City's ongoing efforts of keeping our rivers and streams clean. Private citizens can report potential pollutant sources, such as mud or debris running off of a construction site or illegal dumping into the stormwater inlets in the streets, by calling 308-233-3234 or by utilizing 'Access Kearney'. Visit the City website at www.cityofkearney.org and click on 'Access Kearney' in the lower left hand corner. Concerns will remain anonymous.
