CITY OF KEARNEY **PRESS RELEASE** ***For Immediate Release***

Issued Date: October 26, 2018

Point of Contact: Dan Lillis, Stormwater Program Manager, 308-233-3273

Leaves don't go in the street.

City streets are not the dumping grounds for leaves.

Why should you be concerned? Organic matter such as grass and leaves can cause odors in neighborhood creeks and drainage problems that lead to flooding.

City Ord. No. 7352 states: "The owner of the property abutting the sidewalk space shall be responsible for the routine care of such landscape plantings within the sidewalk space, including...raking and disposing of leaves...in accordance with Section 7-502 of this Article..." To learn more, call 308-233-3273.

Lawn Care professionals using leaf blowers on yards are asked to blow leaves and clippings back on to yards. The stormwater system is designed to drain only rain. The large amount of leaves prohibits the stormwater system from meeting peak efficiency. Also, City street sweeping machines are not designed for picking up excessive amounts of leaves. What should be done with the leaves?

- Keep leaves in your yard to benefit from their nutrients
- Rake or blow leaves into a compost pile, where they can decompose without odor.
- Collect leaves in the brown recycling bins the City picks up weekly.
