I agree I am the property owner and I will plant and maintain my native landscape with regular watering, fertilizing, weeding, mulching, and spring clean-up. All Plantings need to be located on private property and outside the right-of-way and vision clearance triangle at any intersection or driveway to protect pedestrians. Weed coverage must not be more than 15% of the planting area as determined by the Code Enforcement officer. Please note, if any vision obstructions are caused for vehicles or pedestrians, we will request the property owner to trim the height of any obstructions to no more than 2-feet.
