| Felt               | Polypropylene  | Vinyl        |
| Flexible Magnet    | Poster Board   | Wallpaper    |

## INSTRUCTIONS

Locate die cuts required

Place die, foam side up, on the metal tray

Place your material on top of the die

Turn handle to roll the tray through

(Pro Tip: cut with die blades running under the roller  
at an angle instead of parallel — much better cuts!)

Repeat until your project is completed
