

Visit the City of Kearney Rain Barrel Display Area.

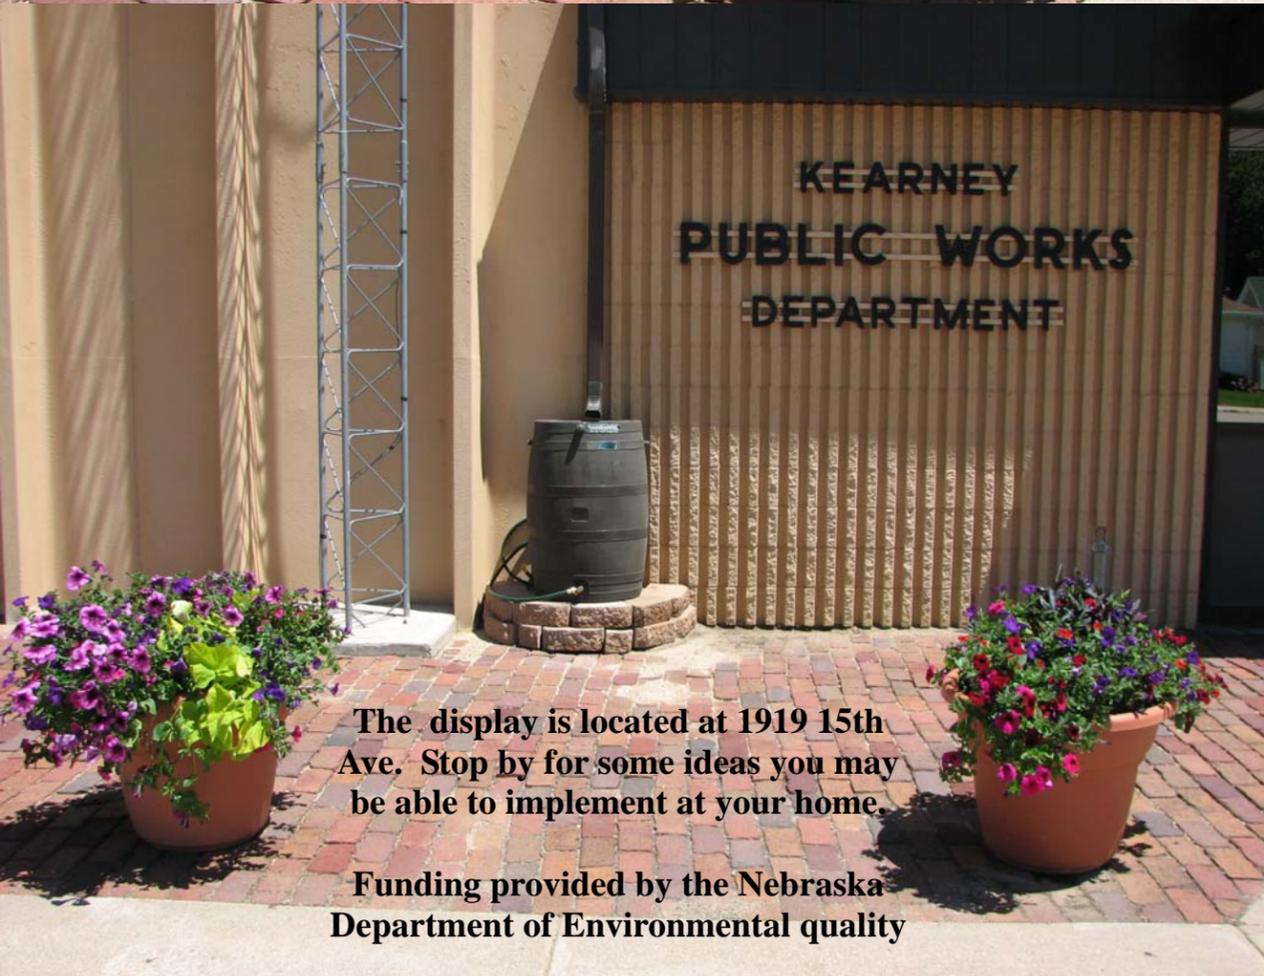

Get Ideas On How You Can Help Conserve Water and Protect Our Local Environment.

Collecting rainwater for your garden is a smart idea, no matter what your motivation. Plants like rainwater, because it's naturally soft, and free of chlorine and other chemicals. If you're on the municipal water system, you stand to save a considerable amount of money. You may also find that having a rain barrel is a handy alternative to the garden hose.

When you look at the numbers, it's surprising how much water you can collect every time it rains. Just a half inch of rain falling on a 1000-square-foot roof will yield 300 gallons of water.

Rainwater collection systems can be created in many ways. Make it a family project "Build Your Own Barrel". If you would like to conserve water and reduce stormwater runoff at the same time, this may be the project for you!

More information is available on the Nebraska H2O website.

The display is located at 1919 15th Ave. Stop by for some ideas you may be able to implement at your home.
